We can help you:

- ❖ Increase sales leads
- ❖ Brand your company in the industries leading directory
- ❖ Gain customers by placing your logo and company brand in the listing section and/or the yellow pages.

“Connecting People to Products” since 1885

Known as the “Bible of the Industry”

A to Z Directory - An index of more than 8,000 company's are listed for quick reference for the page number where the detailed listing can be found.

Manufacturers & Converters - Over 2,500 companies are listed geographically and alphabetically with detailed listings containing information on products, personnel, locations and equipment.

Merchants / Distributors - listed geographically, over 3,500 distributors from United States, Canada and Puerto Rico.

Sales Agents and Representatives - Brokers, sales agents, traders and representatives are listed alphabetically, as well as geographically.

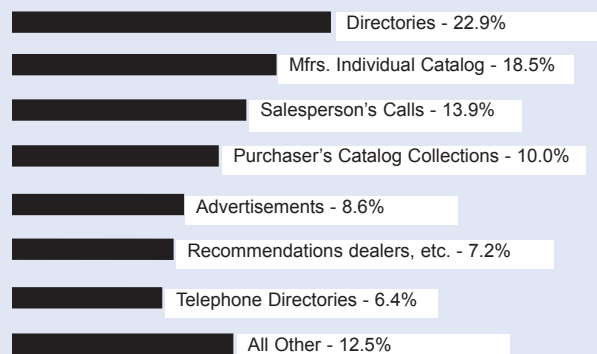

Suppliers / Services - Companies that supply raw materials, machinery, equipment and services to the pulp and paper industry.

Classified Section - Contains over 2,700 product categories listing the manufacturers or converters. Used by distributors looking to source new product lines.

Here is why Directories have such impact:

- Used daily as a tool throughout the industry.
- Directly reach prospects when they are looking for a very specific product.
- Reach "hard-to-reach" executives, increase your company and brands recognition.
- Keep track of the "new personnel" that have replaced the people your sales team has called on in the past. Directories help maintain accurate information.
- "Calls regularly" on prospects off the beaten path
- Uncovers "missed" companies that are using your products or have just developed a need for your products

Survey proves Directory Listings leading source of all new customer contacts!

Source: Association of Industrial Advertisers

Industrial Directories initiate more contacts than telephone directories. In fact, they initiate more contacts than any other source of communications available.
